

Eastern Montana Education Telecommunications (EMET) Member Contact List

Mid-Rivers is working in coordination with the Office of Public Instruction (OPI) and has agreed that there will be no additional charges for bridging on the Mid-Rivers system since the video conferences with OPI are for educational purposes. In addition, Vision Net will not charge OPI for use of the interconnect with Mid-Rivers for access to their sites. We thank them both for their cooperation.

Mid-Rivers began working with schools in early 2001 and a systems integrator company to come up with a technology to fit the area's needs. A Broadband Media System was designed, and Mid-Rivers secured over half a million dollars in grants for area schools to install the updated classroom equipment necessary for the new system. New Broadband Media classrooms were installed at 17 sites during the spring and summer of 2003, and these new sites have all come together as the EMET consortium for the purpose of sharing teaching resources.

The 17 EMET sites with state-of-the-art Broadband Media Systems are listed below.
